

SYNCHRONIZATION FOR EVERY NEED

Woodward understands the time-intensive nature of Power Generation projects. Ensuring the components longevity is one way we can make our customers successful. Woodward has supplied and supported the well-established SPM-D line of synchronizers for 20+ years. With the form, fit, and function compatible SPM-D2 the longevity of this synchronizer line is now extended. All SPM-D2 synchronizers are password protected and configurable either through the HMI as before, or through ToolKit configuration tool.

Broader Application Range

- Applied with several types of gensets - from fast reacting diesel engines to soft reacting gas turbines
- Compatible with a wide range of GOVs, AVRs and Circuit Breakers
- Switchable parameter sets available
- Wide range power supply available

Simplified Configuration and Commissioning

- Woodward's ToolKit configuration support
- USB connectivity to PC
- Front face synchronoscope for easy commissioning
- Configurable through HMI or PC

Drop-In Replacement

- Same look and feel as SPM-D synchronizers
- Ensures system longevity
